

## INTERNAL FILTER

USER MANUAL

**Model: V100/V600**

Before operating this device, read these instructions completely and keep them readily available for future reference.

**CE IPX8** 

**AQUAVIE.France®**

# INTERNAL FILTER

Model **V100/V600**

Thank you for purchasing an AQUAVIE product.

Before operating the device, please read these instructions carefully and keep them in a safe place for future reference. Please pay particular attention to the safety instructions. The device must only be used once these instructions have been fully understood.

## **WARNING**

- This product is not a toy. Keep it out of the reach of children and persons with reduced mental capabilities.
- When unplugging the device, always hold the plug. Never pull directly on the power cord.
- Do not cut or replace the plug of the device yourself, as this may result in a significant risk of electric shock or fire.
- Do not replace the power cord of the device. If the cord is damaged, the device must be disposed of in accordance with your local waste disposal regulations.
- Do not disassemble the device yourself, as it contains sensitive electronic circuits.
- If the device is not going to be used for an extended period of time, unplug the power cord, empty the filter chamber, and store the device after it has been completely dried.
- Please ensure that the supply voltage and frequency of your electrical network match those indicated on the rating label.
- The pump must be supplied through a residual current device (RCD) with a rated residual operating current not exceeding 30 mA.
- Do not lift or carry the pump by holding it by the power cord.
- Always unplug the device from the power supply before carrying out any maintenance operation, as your hands will come into contact with the water contained in the aquarium. Risk of electric shock.

### IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of electric shock:

Do not place anything on the device.

Do not use the device during a thunderstorm, as this may cause an electric shock.

### DISPOSAL OF THE DEVICE

Do not dispose of this device with your household waste! To dispose of it, please use your local waste collection and recycling system.

**CAUTION:** The water level must be sufficient. Do not operate the filter without water.

### WARNING

Do not use the filter with water at a temperature above 40°C, as this may damage the filter.

Always set the switch to the OFF position before carrying out any maintenance operation or placing your hands in the water in which the filter is immersed.

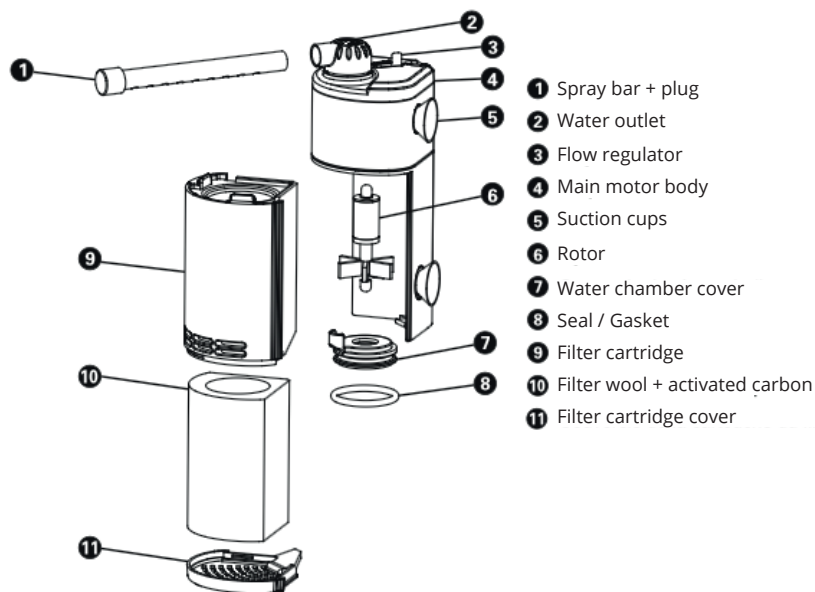

Do not pull on the cord.

To reduce the risk of electric shock, always keep it plugged in the device on a circuit protected by a circuit breaker with a grounded plug.

### FEATURES

- Triangular shape that allows the filter to be installed in a corner of the aquarium where it takes up less space.
- High-quality resin material to seal and prevent electrical leakage.
- Unique design that facilitates the cleaning and replacement of filter elements.
- High-quality biochemical filter sponge.
- Activated carbon that better eliminates impurities and water coloration.

### WARNING

Regular maintenance of the device is required (see description in this manual). Always switch off the device before cleaning or carrying out maintenance.

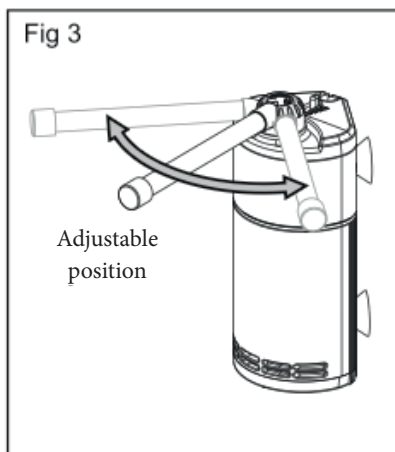

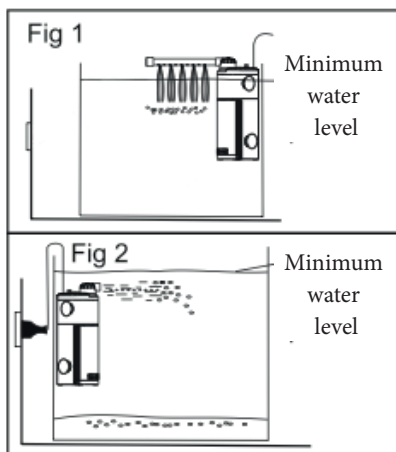

# INTERNAL FILTER

Model **V100/V600**

## OPERATING INSTRUCTIONS

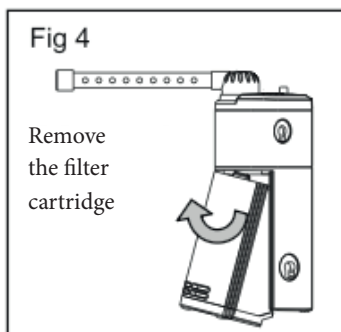

1. Place the filter inside the aquarium using the suction cups (Note: never immerse the plug in water).
2. Check that the water level is sufficient for the filter (see diagram below).
3. If you wish to install the filter as shown in diagram 1 below, position the spray bar above the water surface and adjust the direction to achieve the optimal effect.
4. Switch on the filter once the installation has been completed and checked.

## MAINTENANCE AND CLEANING

1. Unplug the filter before cleaning and maintenance.
2. Remove the filter cartridge to clean or replace the components.
3. Remove the rotor chamber for cleaning and maintenance.

The rotor can be rinsed with clean water. Never use abrasive or corrosive cleaning agents to clean the filter.

## WARRANTY

### WARRANTY CONDITIONS

1. This product is guaranteed by **AQUAVIE** against manufacturing defects in parts and workmanship for a period of two years from the date of purchase.
2. If the product has been damaged during normal use, it will be repaired or replaced. Warranty service is provided upon presentation of proof of purchase (invoice or receipt) showing, in particular, the date of purchase.

### Risks not covered by the warranty:

1. The warranty cannot be claimed in the event of damage resulting from improper use, user negligence, accident, modification, or repairs carried out by unauthorized persons or companies.
2. If the device no longer operates due to improper maintenance, the repair costs will be borne by the user, even during the warranty period.
3. The warranty is only granted upon presentation of valid proof of purchase showing the date and the seller's contact details.
